

Post Date: July 31, 2020
Job Title: Project Architect/Project Designer
Organization: TEA2 Architects
Description: TEA2 Architects is looking for a Project Architect/Project Designer with a professional degree in architecture and 3-5 years professional experience who would like to work in high-end residential design. Our firm of 23 individuals provides great opportunities for first-hand experience in a team-oriented setting.

DUTIES: Depending on experience and expertise, Project Designer/Manager/Intern meets with clients and/or acts an integral member of the design team, developing and producing projects through each phase of the work. Teamwork with team members and Principals is very important. Work may include support role on teams depending on experience. Must be proficient with software to create, communicate, and coordinate the work. CAD and Microsoft Office experience required. Experience with Sketch-up modeling software preferred. Microstation and Enscape a plus.

QUALIFICATIONS & REQUIREMENTS: We are looking for an individual holding a professional degree in architecture (MArch or BArch) with 3-5 years of professional experience. Previous work experience in high-end, single-family residential beneficial but not required. Start date is flexible. This is a full-time career position with potential growth opportunities.

SUBMITTAL: Please submit your resume and portfolio (portfolio not to exceed 10 pages) as a pdf. With your materials, please include possible start date.

Salary: DOE

Misc. Info: **DESCRIPTION OF FIRM:** TEA2 Architects is a residential architecture firm located in historic Fire Station 28 in Linden Hills — a vibrant southwest Minneapolis neighborhood. We're the second generation of one of the oldest, most experienced residential firms in Minnesota. Since our start 37 years ago, our focus has been on the creation of custom homes and renovations: exquisitely designed, thoroughly detailed, beautifully livable custom homes and renovations.

We've created sought-after homes for clients across North America, with projects in Minnesota, Wisconsin, Arizona, Alabama, California, Colorado, Connecticut, Idaho, Illinois, Florida, North Carolina, South Dakota, Ohio, Virginia and British Columbia.

Our well-managed team of 20+ professionals works collaboratively. Sharing, debate, ongoing refinement, and continued education drive us to elevate our process as individuals and as a team, and cultivate an uncommon level of creative energy that enriches each and every home we create.

If you've seen our highly-published portfolio of work, you know we don't have a specific "style". Instead, we draw inspiration from historical and modern sources, reinterpreting them for modern living, translating our clients' hopes and dreams into fresh, imaginative, and timeless homes.

Our thoughtful, environmentally sensitive, and innovative design has become its own hallmark, garnering a great deal of national recognition. But what pleases us even more? Homeowners who are absolutely thrilled with their homes and who appreciate them more and more with each passing year. The personal investment in the architectural process involved on our end and from our clients as the end user creates a very rewarding professional environment in which to work.
