

TEA2 Architects is looking for a Project Architect/Project Designer with a professional degree in architecture and 5-10 years professional experience who would like to work in high-end residential design. Our firm of 26 individuals provides great opportunities for first-hand experience in a team-oriented setting.

DUTIES: Depending on experience and expertise, Project Designer/Project Manager meet with clients, lead design team members, collaborate with firm principals, and develop and produce projects through each phase of the work. Teamwork with team members and Principals is very important. Must be proficient with software to create, communicate, and coordinate the work. CAD and Microsoft Office experience required. Experience with Sketch-up modeling software preferred. Microstation and Enscape a plus.

QUALIFICATIONS & REQUIREMENTS: We are looking for an individual holding a professional degree in architecture (MArch or BArch) with 5-10 years of professional experience. Previous work experience in high-end, single-family residential beneficial but not required. Start date is flexible. This is a full-time career position with potential growth opportunities.

SUBMITTAL: Please submit your resume and portfolio (portfolio not to exceed 10 pages) as a pdf. With your materials, please include possible start date.
